

Eagle Lifting Cushion

Product Code: MPCA210400

The Mangar Eagle (Emergency AGile Lifting Equipment) is the latest innovation in safe patient lifting, specifically developed for single-handed care scenarios. This lifting cushion is engineered to first sit up and then lift a fallen person, providing a comprehensive solution that supports patient dignity while significantly reducing the risk of musculoskeletal injury to the caregiver. Its design provides integral support to the patient's back, neck, and head, ensuring a safe and stable lift for individuals weighing up to 220 kg / 35 stone. The Eagle's portability and rapid deployment capabilities make it an indispensable asset for community-based healthcare professionals who require efficient and reliable equipment.

Powered by the portable Airflo 24 compressor, the Eagle offers consistent performance, capable of performing up to six lifts per charge, making it a highly effective tool for demanding professional use.

KEY FEATURES

Developed as a specialist tool for home care environments, facilitating safe and efficient patient recovery after a fall.

The unique design allows for effective operation in confined spaces, including situations where the patient is against a wall.

Designed with infection control in mind, the entire cushion is easy to wipe down, clean, and fully disinfect.

Provides essential postural support to the back, neck, and head, ensuring patient stability throughout the lifting sequence.

Inflates rapidly using the portable Airflo 24 compressor and a simple 4-way handset for precise, controlled operation.

Its lightweight and portable nature makes it ideal for community nurses and other mobile healthcare professionals to transport.

Optimised for single-handed care, empowering one clinician to safely manage a patient lift without requiring additional support.

The dedicated Airflo 24 controlled system ensures a smooth and regulated inflation for a safe patient lifting experience.

SPECIFICATIONS

- **Inflated Seat Height:** 56 cm / 22"
- **Inflated Width:** 64 cm / 25.1"
- **Inflated Depth:** 57 cm / 22.4"
- **Product Weight:** 5.7 kg / 12.5 lbs
- **Max User Weight:** 220 kg / 35 st
- **Lift performance per charge:** 6 lifts
