

Opera Flo Auto Full Mattress Replacement System

Product Code: MAM028-30

The Opera® Flo Auto Full Replacement Mattress System offers advanced care for high-risk individuals, delivered rolled for convenient setup. Central to this is its auto-weighting technology and an extra low noise pump, supporting users up to 150 kg for superior comfort. This system is designed to both prevent and treat users at high risk of developing pressure sores, and is suitable for treating existing tissue damage.

The Flo Auto features 16 alternating air cells to effectively redistribute pressure across the body. Its vapour-permeable, antimicrobial PU cover promotes skin integrity by reducing moisture build-up and allows for easy cleaning. Secured with elasticated straps and offering comfort adjustment, its super quiet pump ensures an undisturbed environment.

KEY FEATURES

High Risk Prevention & Treatment: Designed for high-risk users to prevent and treat pressure sores, including existing skin and tissue damage.

Alternating Therapy System: A full replacement system with 16 air cells that alternate to redistribute pressure effectively across the user's body.

Antimicrobial & Vapour-Permeable Cover: A breathable, water-resistant PU cover with antimicrobial agents helps skin integrity by reducing moisture and resisting bacterial growth.

Secure Mattress Retention: Equipped with elasticated mattress retention straps to securely fasten the full replacement system directly to the profiling bed base.

Auto-Weighting Technology: Automatically responds to user body weight, applying the optimum level of airflow through the mattress cells for effective pressure redistribution.

Super Quiet Pump Unit: The pump emits minimal noise, allowing users to remain undisturbed while sleeping and not interfering with daily life.

Comfort Adjustment Setting: Allows caregivers to add or remove air from the mattress, manually adjusting the firmness to meet individual patient comfort needs.

Delivered Rolled for Convenience: The system is delivered rolled for convenient setup, storage, and installation, making logistics simple for caregivers and technicians.

SPECIFICATIONS

- **Overall Depth:** 18 cm
- **Overall Length:** 200 cm
- **Overall Width:** 90 cm
- **Product Weight:** 8.5 kg (pump 2.5 kg & mattress 6 kg)
- **Mattress Type:** Dynamic
- **Risk Factor:** At High Risk
- **Max User Weight:** 150 kg / 23.6 st
