

SENcastle Access Sensory Room

Product Code: SENS

The SENcastle is a complete, multi-sensory environment designed as a practical and affordable alternative to a traditional sensory room. This innovative 2x2m sensory space can be installed in approximately 20 minutes, creating a fully immersive experience that minimises external distractions and provides a safe, controlled area for therapy.

It is an essential tool for therapeutic, educational, and healthcare settings, supporting users with sensory integration difficulties, autism spectrum disorders, and ADHD. Using an expanded system of 57 themed cards, therapists can activate a comprehensive library of unique sensory scenes designed for relaxation, stimulation, or emotional recognition. The SENcastle includes a full suite of sensory cushions, providing a rich, whole-body experience to meet a diverse range of clinical and educational needs.

FEATURES

Advanced Sensory Scenes: Utilises 57 themed cards to activate a comprehensive library of sensory scenes, allowing for highly specific and targeted interventions.

Dynamic Light & Sound: Features a central LED column with adjustable colours and visual effects, plus a base with integrated sound reproduction, all controlled via the card system.

Professional Grade Construction: Built with waterproof, highly resistant, anti-bacterial, and anti-fungal fabric for durability and safety in multi-user clinical or educational settings.

Interactive Recordable Cards: Includes a set of interactive cards that allow therapists or users to record custom messages, promoting active participation and understanding of cause-and-effect.

Complete Cushion Set: Comes with a full suite of sensory cushions—including vibrating, tactile, multi-sensory, weighted, and auditory options—for a holistic sensory experience.

Rapid Installation & Portability: The entire sensory room is fully mobile and can be assembled in approximately 20 minutes, making it ideal for multi-room use.
